DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Species I-A: Fig. 4

Species I-B: Fig. 7

Species I-C: Fig. 8

Species I-D: Fig. 9

Species II-A: Figs. 10-11

Species II-B: Fig. 12

Species II-C: Fig. 13

Species II-D: Fig. 14

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination (Claims 9-14, 19, 23 and 24, drawn to dehumidifying and air-conditioning system, classified in class 62, subclass 271) and subcombination (Claims 1-8, 15-18 and 20-22, drawn to gas turbine or IC engine system, classified in class 60, subclass 784). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination is directed to other aspects including the dynamo, passing the exhaust through a sound absorbing material and specifically requires the hot air being produced by a heat exchange with cooling air being heated

Art Unit: 3744

in the casing. The subcombination has separate utility such as in any general purpose dehumidifying and air-conditioning applications, which are operable independently of a gas turbine or IC engine, e.g., with a source of hot air from a furnace.

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Invention I: Species of Gas Turbine or IC Engine Systems

Species I-A: Fig.4

Species I-B: Fig.7

Species I-C: Fig.8

Species I-D: Fig.9

Invention II: Dehumidifying and Air-conditioning System

Species II-A: Figs.10-11

Species II-B: Fig.12

Species II-C: Fig.13

Species II-D: Fig.14

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (I-A,I-B,I-C,I-D,II-A,II-B,II-C or II-D) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
